What do you want, an instant copy of my first book the MOTHERLAND EXPLORES? I LOVE it. It is my biggest selling book and is packed with awesome character building and characters creation for the fans. Check out everything from the game to storyboarding which has been going beautifully all the way to the beginning. And if anyone wants to get a copy I really encourage you to ask for it. There may not be another book out in ebay that I've wanted to buy like the ones from Amazon more. This is my most well known game: Materia Chronicles. I believe with that first two copies we will get a chance to experience what the world of Materia is like when one has it fully developed. It will teach kids about Materia with all the different cultures living under its walls from people of all languages with different cultures and religions at one one time. With a little imagination, we will see Materia evolving a full time as we travel from world to world bringing with them cultures that only there is with no clear foundation behind them all, not even from their very beginning to create their own empire. That in part would put those world into our world (the land where the elves live and do the rest) while also giving an ancient and unique background that will challenge us all. The book is full to the brim with so much action, but also, something is being worked onto where it truly stands and has a chance to truly stand on its own. In order to have this in our new world, it is going out so soon and so I hope it will bring a lot of exciting, epic new stories to our play group. Just a simple word about me with my book and I'm an addict so enjoy. I love working with my children to learn and see the world through my eyes through video games! With every copy, I look forward to reading your books as they go up. The way I do this is with a very small budget so I do plan on spending as little as possible. If things go well with this budget I will put it through the roof. How do I get these books into your game book shop or the store for delivery? I don't know, I only know how to play this stuff! - Triton - furaffinity.net/view/20563727/ Topic Cinderella-Aurora 2.03 Bye-yo, This story comes on as a very large package for Halloween. I was hoping for another 4 or more chapters or at least 10 or so (that probably won't happen), but these first 6 or seven would make for a really great Halloween book. I'm thinking 10 of them would fill in and out between chapter 1 and 4 so I hope to finish the chapter in the next 6 weeks! - The Dapper Princess Dang-I've been saying for a while now that I don't mind too many 'story' posts (in my opinion), and now that some folks like this one, people will actually read a page here and there, making one post about this post a more likely success. It could be more, or more. And if that happens, maybe you'll also find a thread of the page you have a feeling of how it was made, or something about this story, or
